

Shared Services Canada — Delivering Digital Solutions Together for Canada

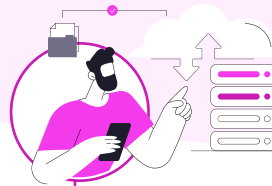

Connectivity Services

An approach that meets the needs of users by leveraging commercial and public networks and wireless technologies.

Hosting Services

An approach that supports a reliable and sustainable hosting ecosystem where workloads and enterprise application data can be transferred across GC infrastructure at speed and scale.

Digital Services

An approach where users have a common digital experience with full access to a standardized core bundle of tools, anywhere at anytime, from any GC-approved device.

Cyber Security Services

An approach where users can seamlessly and securely access the tools they need through a single secure digital identity.

Innovation and Service Evolution

Exploring cutting-edge, state-of-the-art technology to discover and deliver **innovative solutions** to clients and partners that meet users' needs and business requirements.

Vision

Powering world-class technology for Government

Digital Together

Service delivery focusing on achieving service excellence through more **transparency, predictability, responsiveness** and **accountability**.
