

Executive Leadership Development Program (ELDP)

The Executive Leadership Development Program (ELDP) provides targeted learning and development opportunities for current federal public service executives in two streams, at the EX-01 to EX-03 levels and at the EX-04 and EX-05 levels. The ELDP gives senior public servants an opportunity to deepen their leadership role in enabling innovation, fostering collaboration and delivering results for Canadians.

Participants are exposed to real-world experiences and issues, with guidance from senior leaders. The ELDP is a non-promotional leadership development program that supports the strengthening of connections amongst executives in an effort to increase networks, share best practices and broaden individual perspectives. The ELDP provides a learning experience that cannot be found in executive programs available outside the public service.
