## Knowledge Check 3 of 3

During a routine inspection at a manufacturing plant, you notice a sudden change in the behaviour of the regulated party. They become visibly agitated and raise their voice, saying: "I don't care what your regulations say. There's no way in hell you're going to take these away from me - I paid for them, they are mine!". The regulated party then throws down their tools while moving towards you and yells: "Get the hell off my property right now!".

The sudden shift in behaviour in this scenario would be categorized as assaultive.
